Office of the Administrator

JAN 18 1979

Honorable William J. Perry
Under Secretary of Defense
for Research and Engineering
Washington, DC 20301

Dear Bill:

As you know, the Program Review Board has been tasked under PD NSC-42 to work on the problem of technology transfer among the sectors. I feel it might be appropriate to ask the Board's Technology Committee, which Defense chairs and which has representation from the other member agencies, to take a preliminary look at what makes sense in this area and report to the Board early this spring.

In relation to the same PD NSC-42 requirement, I thought you might want to consider inviting civil agency participation, perhaps on an observer status, in the activities of the Intelligence Research and Development Counsel that you chair. This idea came up during the development of the PD, and we probably should address it rather than have it surface from another source.

Sincerely,

AL
A. M. Lovelace
Deputy Administrator
